## Dialup setup: Mac OS X

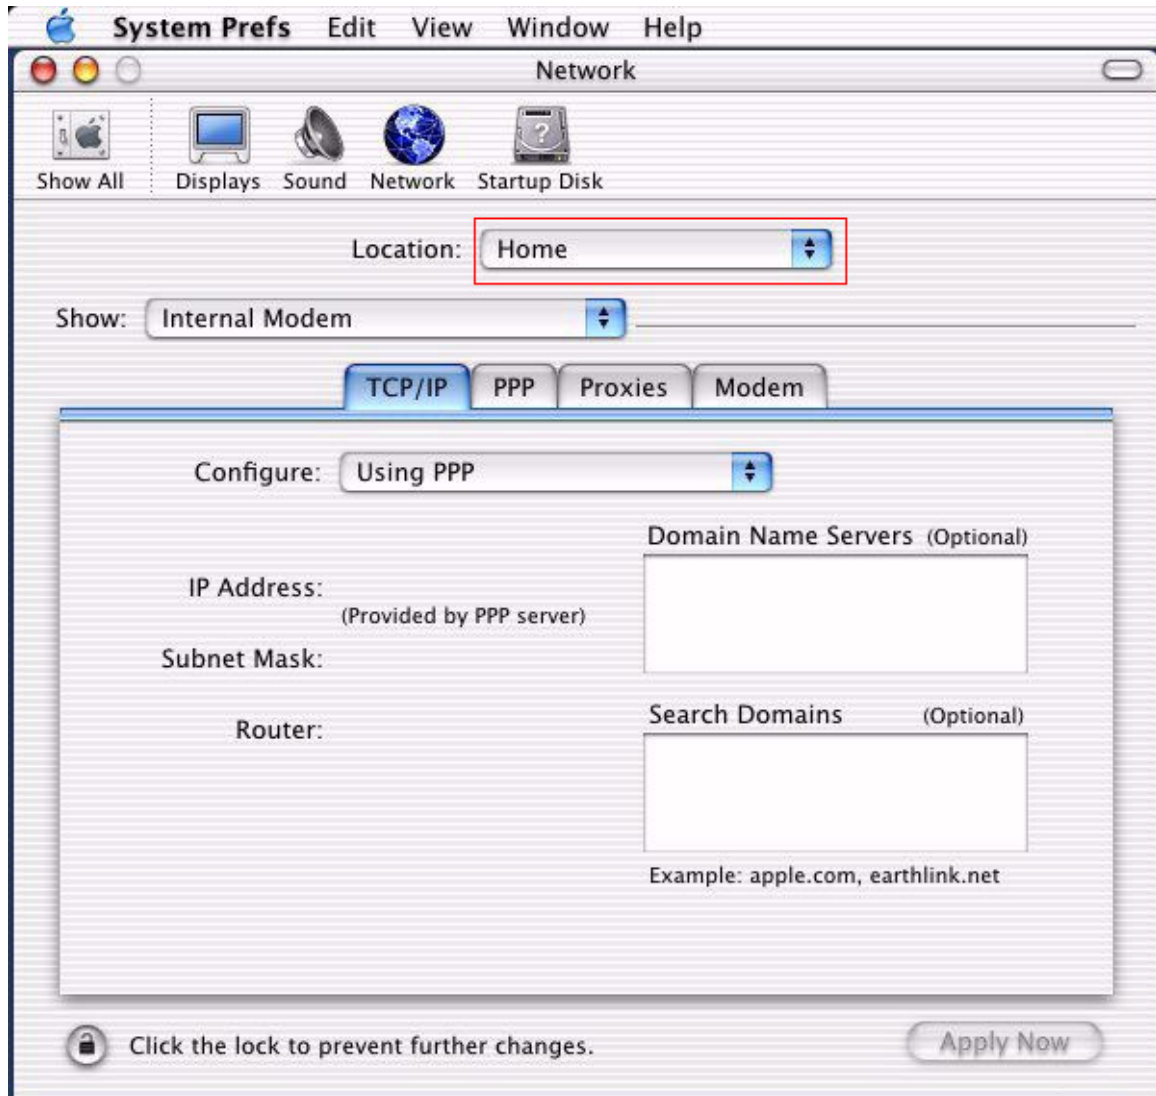

1. Go to the **Apple Menu**, select **System Preferences**.

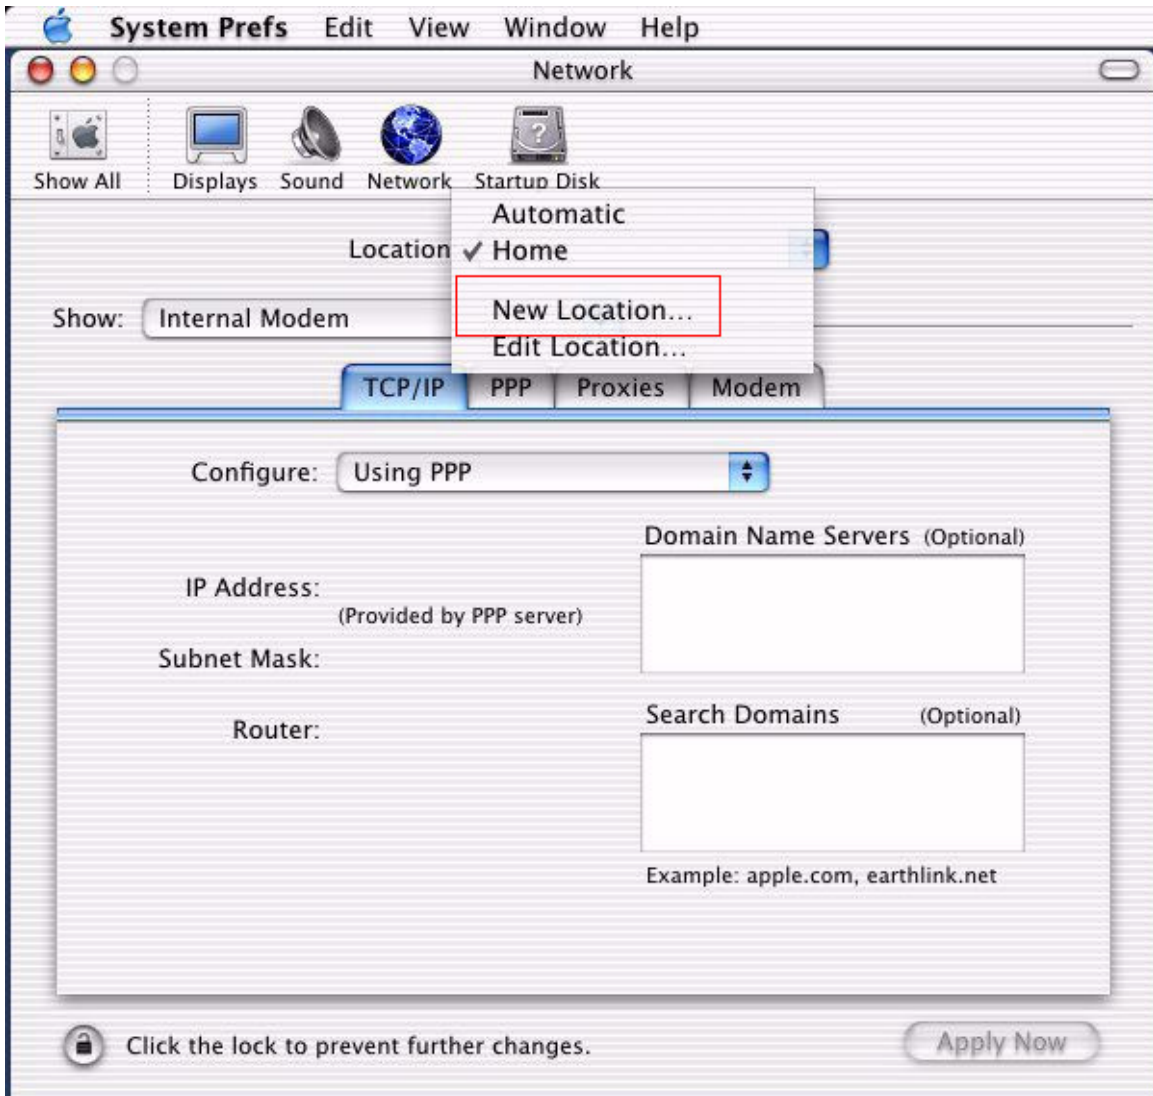

2. Click on the **Network** icon under **Internet & Network**.

3. Click on **Location** drop down list once.

4. Click on **New Location**.

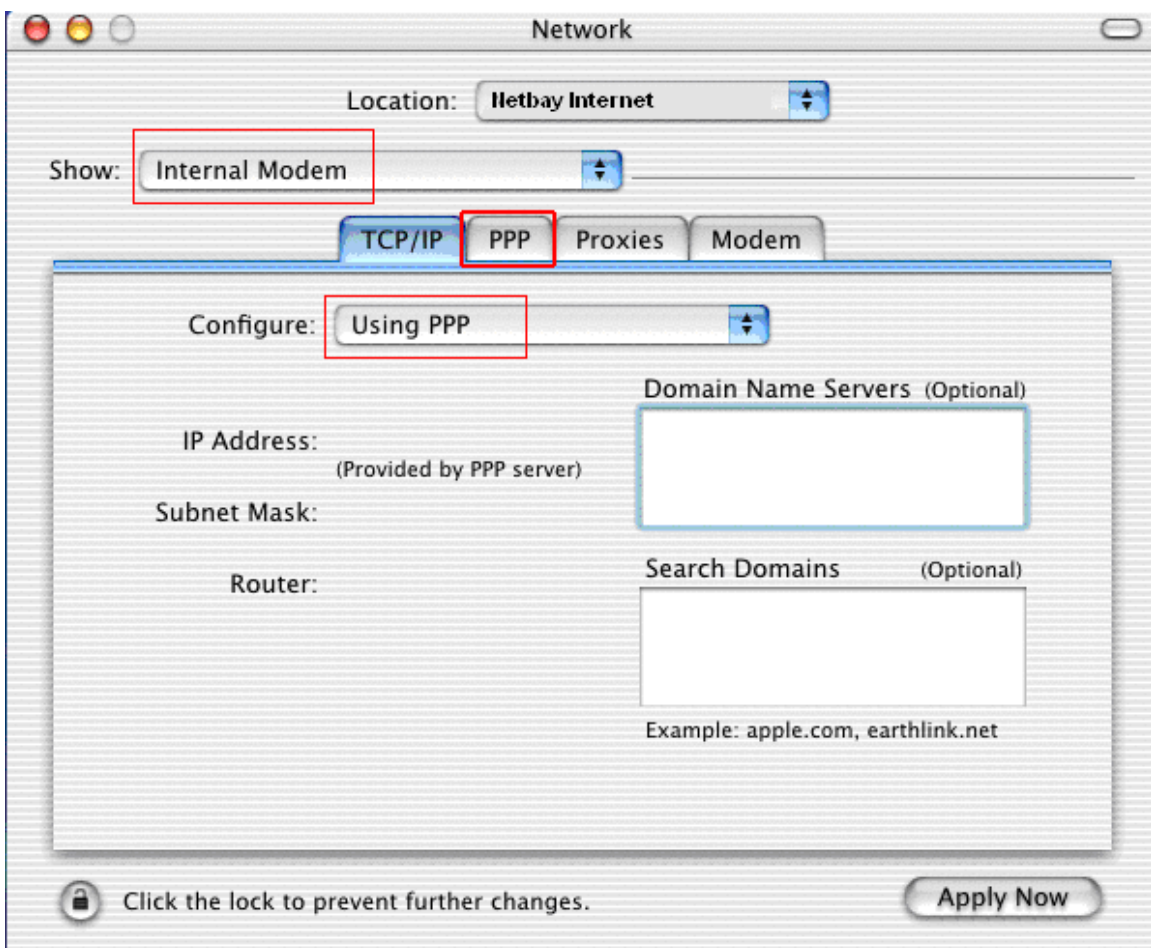

5. Enter **Netbay Internet** as shown below.

Click on **OK** when done.

6. Select appropriate **Modem** from the **Show** drop down list and select **Using PPP** from the **Configure** drop down list.

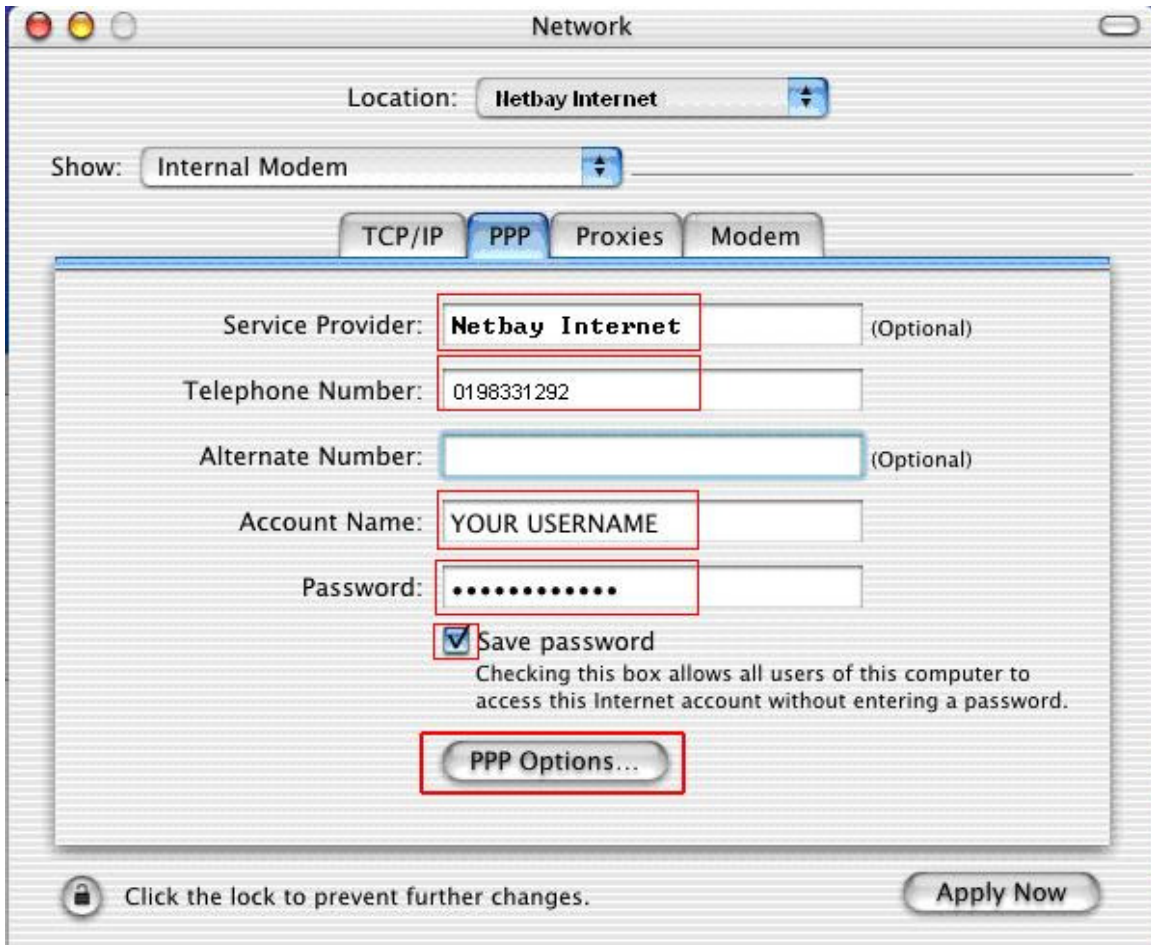

Click on **PPP** tab when done.

7. Enter the configuration as per the screen capture below. Enter your Netbay account username in the **Account Name** field and password in the **Password** field.

**Note:** Account Name: your Netbay account username (Do not include @netbay.com.au at the end of your username)

Click on **PPP Options** when done.

8. Make sure the respective boxes are ticked/unticked as shown below.

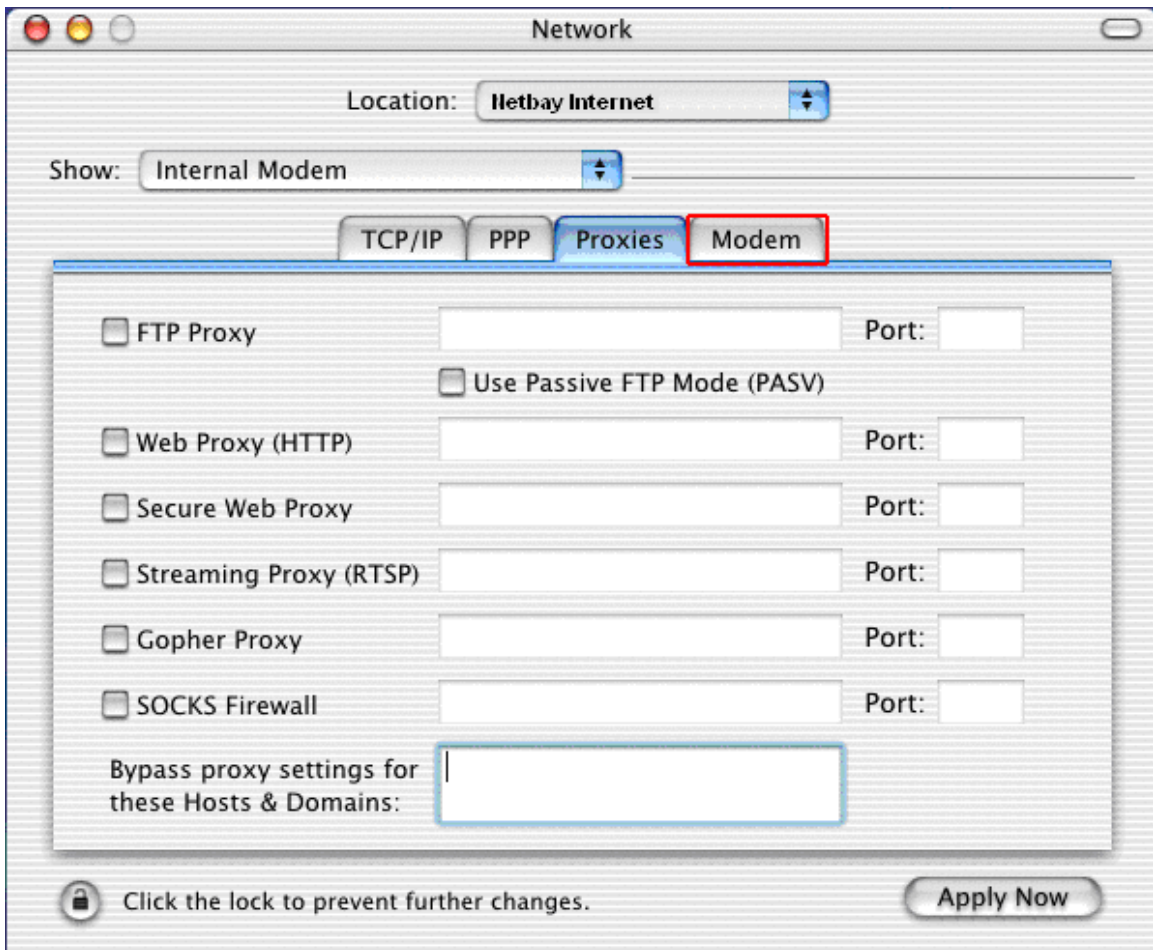

Click on **OK** when done and click **Proxies** tab.

9. Clear all the check boxes as shown below.

Click on **Modem** tab when done.

10. Make sure the settings in this window are similar to the screen capture below.

Click on **Apply Now** when done.
